

# 合约验证

```
npm install -D @nomicfoundation/hardhat-verify
```

<https://hardhat.org/hardhat-runner/plugins/nomicfoundation-hardhat-verify#what>

```
npx hardhat verify --network sepolia DEPLOYED_CONTRACT_ADDRESS
```

etherscan: <https://etherscan.io/>

apikey

## 网页上手动验证（网页上有更多交互，要填的参数也比较多）

- 合约版本：0.8.24
- 验证要注意填上合约编译后的evm target

```
Nothing to compile  
zhangjingzheng@zhangjingzhengs-Mac-Studio verify % npx hardhat compile  
Compiled 1 Solidity file successfully (evm target: paris).  
zhangjingzheng@zhangjingzhengs-Mac-Studio verify %
```

## 自动验证

- hardhat配置
